Exhibition about the love of plants and animals

FROM OUR CORRESPONDENT

DEVECSER An exhibition of Tibor Matyikó a painter and graphic artist living in Balatonvilágos has been opened in the gallery of the cultural centre.

The pictures were recommended by Gábor Ferenczi vice mayor at the opening ceremony. As he said the artist got into close connection with nature at the Secondary School of Forestry in Sopron. He got acquainted with the flora and fauna of the forest there. He likes spending his freetime in the nature equipped with a binocular and plant identification books. In the beginning he took photos, and later he went on drawing and then started painting pictures. He is mostly interested in birds. He has brought about twenty pictures to Devecser. The artist has said it is always a pleasure for him to be requested by magazines, journals to make illustrations. Making the picture material for a book is always a challenge. The exhibition in Devecser will be opened until 16th June.
